

# RadioRA3 | All-in-One Processor

RA3 is the perfect solution for today's high-tech homes, and its **new All-in-One Processor** delivers both great performance and ease of installation.

## FEATURES:

- The Processor combines the functionality of RA2 main repeater and connect bridge and can be shelf, wall or ceiling-mounted to help keep it protected
- Powered by PoE via cat5e (or better) cable from the network router, so you can now install the processor centrally in home for optimal RF coverage—no need for a power supply at its location. No PoE enabled router? The processor kit (RR-PROC3-KIT), is sold with PoE injector included.
- Comes with proprietary QuickFind technology that makes locating the processor during set up much easier
- Has reliable, lightning fast ClearConnect® RF performance
- Plus, it is backwards compatible with RA2 and RA2 Select systems so you can easily upgrade systems and add new RA3 devices with the lightbar design to existing installations
- Programmed via the Lutron Designer PC tool (The PC tool requires a 32 or 64 bit processor running Windows® 10, with a recommended minimum of 8 GB of RAM, 4 GB disk space, and a 2.67 GHz Core i5 processor).
- Supports remote service and programming updates from anywhere in the world using the Lutron Designer PC tool and Lutron App.

All-in-one Processors			Model #	
<p><b>Processor Kit</b></p> <p>Includes PoE injector, shelf mount and Ethernet cables</p>		 <p><b>Shelf Mount</b> <b>L-SMNT-WH</b></p>	 <p><b>PoE injector</b> <b>L-POEI-BL (120V)</b></p>	<b>RR-PROC3-KIT</b>
