

FAMILY OF BRANDS

Ametrix

Versatile indoor, outdoor, and natatorium asymmetric LED luminaires. High-performance optics deliver uniform, controlled lighting in sleek designs.

AtLite

High-quality, reliable exit & emergency lighting for commercial and industrial applications. Approved for the New York City market.

Corelite

Choice of value-engineered linear, recessed, and surface-mounted luminaires. Innovative styling with modern details and high optical performance.

Ephesus

High-performance LED sports and entertainment lighting. Delivers optimal efficiency and enhanced visual experiences for venues of all sizes.

Fail-Safe

Quality luminaires designed to meet the most stringent requirements for complex healthcare, cleanroom, vandal-resistant, and confinement applications.

Fifth Light

Addressable lighting control system that's scalable and flexible. Conserves energy, reduces operating costs, and improves lighting quality.

Greengate

Complete offering of lighting control sensors, panels and switches designed to save energy and meet code compliance for many control strategies.

HALO Commercial

Recessed downlights and cylinders engineered for value, efficiency, and optical performance. Designed to meet commercial energy code requirements.

HALO

The brand leader for high-quality recessed downlight, track, surface, and outdoor solutions. Features state-of-the-art engineering and performance.

FAMILY OF BRANDS

HALO Home

Smart recessed downlights, outdoor floodlights, dimmers, and accessories – all securely connected, automated, and controlled with the HALO Home App.

Invue

Architectural outdoor area/roadway, wall, bollard, and floodlight solutions -- with contemporary dayform designs and brilliant nightform illumination.

iO LED

LED linear accent and cove luminaires. Designed to highlight interior or exterior vertical surfaces and architectural features, or for general illumination.

IRiS

Architectural recessed downlights with unmatched optical control and precision adjustability. Ideal for commercial and high-end residential applications.

Lumark

High-quality outdoor lighting for commercial and industrial spaces. Offers easy installation, superior area safety, and maximum energy savings.

Lumiére

Architectural landscape lighting that combines art and science. An innovative precision luminaire that adds distinction to exterior and interior spaces.

McGraw-Edison

Specification-grade outdoor lighting that sets the industry standard for optical precision, system configurability, and application flexibility.

Metalux

Commercial and industrial recessed, linear, surface, and high bay solutions, featuring the latest LED and driver technology for optimal performance.

Modular Wiring Systems (MWS)

A unique modular wiring system that offers the fastest and most effective way to wire lighting fixtures.

FAMILY OF BRANDS

Neo-Ray

Distinguished, specification-grade linear solutions add quality and contemporary aesthetics to architectural spaces.

Portfolio

Specification-grade recessed and surface downlighting. Features superior cutoff optical performance and control for architectural spaces.

RSA

A line of architectural, multi-lamp recessed downlights. The unique functional design is ideal for accent, display, and wall-washing applications.

Shaper

Decorative, architectural, specification-grade lighting fixtures with differentiated designs for commercial applications.

Streetworks

Get unparalleled performance from the simplest dusk-to-dawn security lighting to the most challenging roadway applications.

Sure-Lites

Innovative and reliable emergency lighting fixtures, exit signs, battery packs, and inverters for commercial and industrial applications.

Telensa

A simple, effective street and smart lighting solution. It empowers cities, utilities, and large establishments to reduce costs and cut carbon emissions by managing their lighting assets.

Trellix

IoT platform providing actionable insights from aggregated data for building owners/operators to improve operational efficiency and occupant experience

WaveLinx

An easy-to-install, cost-effective wireless lighting control solution that simplifies code compliance and system commissioning.
