

## URC ANNOUNCES NEW INTEGRATION WITH JUKE AUDIO'S MULTI-ROOM AUDIO SYSTEM

**New integration brings the ultimate audio platform, integrated into the premiere automation system**

**HARRISON, NY (November 7, 2023)** - URC, a leader in global smart residential and commercial automation, today introduced a next-generation integration with Juke Audio, a global leader in manufacturer and designer of multi-room amplifiers with wireless streaming capabilities. Now, users can access unparalleled control and Juke Audio's leading audio platforms, such as Airplay 2 and Spotify Connect via URC's Total Control® whole-home and commercial automation system.

Juke Audio is a complete multi-room audio solution, distributing clear sound to wired architectural speakers across an entire home or commercial facility, and allowing for seamless wireless streaming from phone/table. The product is simple to install, easy to use, and limitless in its wireless functionality via the downloadable Juke Audio app in the Google Play and Apple App Store.

Combining these powerful systems creates a new age of unified, smart entertainment access for end users. Key benefits include:

**Unified, Seamless Operation** – Juke Audio's superior audio streaming solutions can be seamlessly accessed as part of URC's Total Control system via a single touch screen or handheld remote.

**Simplified Voice Control** - URC's voice enabled devices allow two-way communication and control with simple operation across URC user interfaces.

**Customization to Match User Preferences** – Form multiple rooms, zones or devices, Total Control's superior user experience allow easy entertainment management and usage.

**Create Robust Entertainment Scenes** – With professional programming, users can launch robust scenes in Total Control to create their ideal movie viewing environment.

**Uncompromising Quality and Value** - Reliable product, customizable experience and programmer-friendly system operation.

**Remote, Secure Dealer Access** - Within a secure environment, the integration allows dealers remote access (with end user approval) to trouble-shoot, monitor, or adjust.

"Juke Audio is an American success story and URC is thrilled to bring this break-through integration to our dealer community and excited homeowners. This easy-to-program integration via Total Control enables superior sound quality with unified control and simplified operation. This is going to be a win across URC installations" stated Lars Granoe, URC's Vice President Product Development.

### **About Juke Audio**

Juke Audio is made in the USA and headquartered in Manhattan Beach, California. First coming to market in November 2019, the Juke brand has continued to grow with systems installed throughout North America and accolades received from some of the top AV publications and communities. The product's simplicity and wireless functionality uniquely caters to the present asks of a multi-room system in the modern era of music streaming.
