**This new single-box solution for conference rooms, classrooms, and lecture halls is AVAILABLE NOW.**

---

The new Controller/Switcher is ideal for BYOD settings and social distancing office configurations in the COVID-19 world. The VXP-82 creates important advantages for integrators and your clients:

### **Simplified installation saves time**

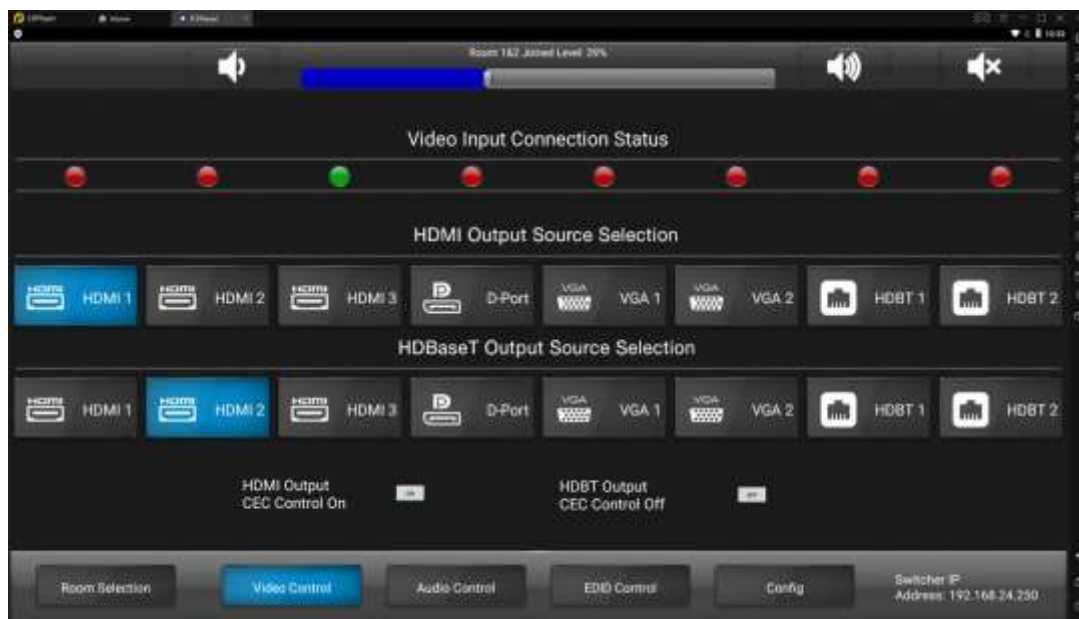

As a single chassis solution, the VXP-82 reduces the time to deliver both exceptional control and advanced AV distribution.

## APEX file included

Not only does the single box solution reduce cabling, but its pre-programmed APEX file significantly reduces on-site configuring. *We'll review this file in the webinar.* (Download it from the product page on the RTI dealer site - login required.)

## Intuitive experience

With control and A/V switching in a single unit, simply plugging in a laptop (source) can set the room lighting, HVAC, external audio amplification, video conferencing and more. And the intuitive interface makes it easy for users to route sources and outputs without relying on the IT department.

## Attach more

The VXP-82 enables control from any RTI touch panels, keypads, remote, or mobile apps, promoting add-on sales of RTI control devices.

## Best for boardrooms

The on-board 8x2 switcher in the VXP-82 distributes Audio/Video signals over HDMI and HDBaseT simultaneously to up to two rooms or to two displays in the same room, thus providing a seamless solution for large boardrooms or socially distanced dual rooms.

## KVM and more

KVM control over USB allows for multiple presentation control options using USB keyboards and mice in different spots in the same or secondary room. Existing in-room USB web conferencing cameras, microphones and speakers can be connected and switched as well as traditional analog or digital audio and video sources such as computers / laptops, document cameras, media servers and streamers, DVD players, and microphones. Thus, the VXP-82 is ideal for BYOD settings and social distancing office configurations. Additional features include a 4K video scaler and an audio mixer.

## Extend the reach

The **VXP-T** (transmitter) and **VXP-R** (Receiver) are designed for use with the VXP-82 Presentation Switcher & Control Processor to extend high-resolution video, audio, Ethernet, control and KVM signals over long distances up to 492ft (150m) via a single Cat5e/Cat6 cable.
