# Epic Mesh

Epic Mesh combines the reliable, solid network performance you've come to expect from Luxul wireless products with a state-of-the-art mesh solution that's simple-to-deploy. With fantastic coverage and excellent data rates, Epic Mesh provides powerful WiFi connections to all your wireless clients.

Enjoy all the benefits below when you choose Epic Mesh:

- **High-capacity 4x4 backhaul –** a strong mesh signal between satellite nodes and back to the router node assures a fast WiFi experience for client devices

- **802.11ac 2x2 technology –** client devices take advantage of powerful high-speed connections

- **Tri-band –** 4x2x2 with the 4x4 band dedicated to backhaul

- **Eight SSIDs –** Enjoy four SSIDs per band

- **Ability to connect numerous IoT devices**

- **Two Ethernet ports per node –** allows for the connection of wired client devices and Ethernet switches to the wireless network at each mesh node location

- **Never sold online**

- **Maintain high dealer margins typical of Luxul products**
