RCA CONNECTORS

Planet Waves RCA connectors are available in three different styles to meet the needs of specific installations. All Planet Waves Connectors are specially designed to work with Planet Waves 3/16" coaxial cable.

ST Series connectors have 24-karat gold plated contacts for excellent conductivity and lowered risk of oxidization. These connectors also feature a black chrome finish.

BC Series connectors are nickel plated with a standard chrome shell. These connectors, like the ST, are a single-piece design.

Planet Waves HD Series (RCAP50) are the original Planet Waves connector design, featuring a die-cast body with 24-karat gold plated contacts.

All connector packs come with extra colored rings for color-coding connectors by application.

ST Series BC Series HD Series
