INTRODUCING

ring Retrofit Alarm Kit

New life for old security systems.

Retrofit Alarm Kit $199.00

Ring Retrofit Alarm Kit

Wired-to-wireless home security. Ring Retrofit Alarm Kit allows existing wired contact sensor zones to connect to a wireless Ring Alarm system and control it from the Ring app. Professionally install and connect up to 8 contact sensor zones with one Retrofit Alarm Kit.

*Does not work with existing third party keypads.
*Requires Ring Alarm Base Station.
*Professional installation recommended (but not required).
*Add more Retrofit Alarm Kits to cover more zones for your home.

Works with Alexa

Link Ring Alarm to Alexa for hands-free voice control. Arm, disarm, and check the status of the security system through any Alexa-enabled device. Also works with Alexa Guard – have customers receive Smart Alerts sent to their phone if Alexa detects the sound of smoke alarms, carbon monoxide alarms, or glass breaking when they're away. And with Ring Protect Plus, get quick access to the Ring app when they receive a Smart Alert to directly request dispatch of emergency responders.

Daily Use Cases

Control it from the Ring app	Ring Protect Plans	We want you to know
Receive mobile notifications when wired contact sensors on doors and windows are opened. Arm and disarm the system with a simple tap. Allow customers to manage all Ring video doorbells, cameras, and Alarm devices from one simple dashboard.	Customers can get even more out of all Ring devices with Ring Protect, a comprehensive service that lets them review what they missed and get 24/7 emergency services with professional monitoring. They can see, save, and share videos and photos when they activate Ring Protect Plus for $10/month per household. Register on the Ring app. Cancel anytime.	This product is for customers that have existing wired contact sensor zones from an existing security system that are in good working order. A Ring Alarm system is also required for Retrofit Alarm Kit to function. We recommend professional installation by an experienced security system installer or licensed electrician. Please note, this product can only ship to and be used by people at addresses in the 50 US states.

Tech Details

Power	*2 x 3V Lithium 123. Batteries included*
Battery Life	*5 years with 100 events per day*
Operating Conditions	*32° F to 120° F (0℃ to 49℃)*
Dimensions	*4.53 in. x 4.53 in. x 1.0 in. (11.5 cm x 11.5 cm x 2.54 cm)*
Installation	*Professional installation recommended. Mounts to walls with provided double-sided tape or mounting hardware.*
Connectivity	*Z-Wave (250-foot range to Base Station)*
Compatibility	*The Ring Retrofit Alarm Kit design supports a maximum resistance of 5200 ohms under all supported operating environments. This is intended to be compatible with a typical wired home alarm install, which commonly use 4700 ohms, 1000 ohms or 2000 ohms end of line resistors. Note that the amount of wire used in most wired home alarm installs does not add a significant amount of resistance. (for example: 500' of wire adds about 12 ohms of resistance.)*
Setup Requirements	*Ring Alarm Security Kit*
Warranty and service	*1-year limited warranty and service included*
