eero CI – Fast smart home WiFi.

The Quick Read

- Newest eero dual-band, Ethernet, 2x power
- Entry Level Router affordable internet
- Next generation mesh technology

- Dynamic rerouting of network traffic
- Advanced network security
- Automatic over-the-air updates

The Whole Story

- eero is the little router with a huge wireless footprint, delivering fast speeds and a reliable signal. Set up eero as a standalone router or extend any existing eero setup by up to 1,500 sq. ft.
- eero's industry-leading TrueMesh™ software uses dynamic routing to keep traffic balanced for the fastest and most reliable WiFi network.
- **TrueMesh** technology knows the signal strength between each eero and constantly recalculates the best path from any device to the Internet.
- **eero** is the only system that can mesh any combination of Ethernet and WiFi devices to ensure the fastest speeds and best coverage.

Any Home Any Configuration

Wired or wireless to meet the needs of your customer's home.

Automatic updates to insure your customer's network is always up to date.

WPA2 out of the box for an unmatched secure network installation.

Thread 1.1 border router for future proof installations.

Pro only network set-up and transfer feature.

Expandable to fit any home; any number of rooms, square footage, or building material type.

The Tech Specs

	eero	6610110
WiFi	Dual-band Wi-Fi radios, simultaneous 2.4 GHz and 5 GHz, 2x2 MU-MIMO, beamforming, IEEE802.11a/b/g/n/ac	Tri-band WiFi radios, simultaneous 2.4GHz, 5.2GHz, and 5.8GHz wireless 2x2 MU-MIMO, beamforming, IEEE 802.11a/b/g/n/ac
Wired	Dual auto-sensing Gigabit ports for WAN and/or LAN connectivity	Dual auto-sensing Gigabit ports for WAN and/or LAN connectivity
Support	1-year limited warranty. See eero.com/legal Customer support at eero.com/support	
Smart home	Works with Alexa, Amazon WiFi Simple Setup, Bluetooth LE 5.0	
Nightlight	None	None
Electrical	100-240V AC, 50-60 Hz	
Hardware	700 MHz quad-core processor, 512MB RAM, 4GB flash storage	
Security	WPA2 encryption, Family Profiles, DHCP, NAT, VPN Passthrough, UPnP, Static IP, and Port Forwarding	
Required for setup	Supported iOS or Android device, Internet service (with cable or DSL modem, if required). See eero.com/requirements	
Processor, memory, and storage	700 MHz quad-core processor, 512MB RAM, 4GB flash storage	
Additional Wireless Connectivity	Works with Alexa, Amazon WiFi Simple Setup, Bluetooth LE 5.0	
Networking	DHCP, NAT, VPN Passthrough, UPnP, Static IP, and Port Forwarding
